

## Years Not Lost. How to Stay Attractive for Industry While Working in Academia

Trainer

**Dr. Philipp Gramlich**  
NaturalScience.Careers

He has studied and researched chemistry at five universities in Germany, Australia and Scotland. He gained experience in industry, first at baseclick, a biotechnology start-up and later at Eurofins Genomics as Teamleader R&D, QC and Analytics, being responsible for up to 22 staff. Since 2016, he is fully focusing on his work as co-founder of NaturalScience.Careers. He specialises in seminars and talks about career development, leadership and presentation skills. Since 2016, he regularly writes career columns for Nachrichten aus der Chemie.

### Objective

You do research at university and love your work. However, you don't want to run into a dead-end street, being kicked out of the ivory tower in your early forties. Can you prepare for a possible exit strategy, increasing your market value while working in academic research?

### Description

With this short online presentation, we want to look at how you can make the most of your time at university. What is it actually that makes the employers out there keen to get to know you?

We'll take a look at activities which not only increase your market value but which give you personal growth and which you will enjoy!

And your professor? She'll be happy with your extracurricular activities if she profits from having skilled staff. And if not? Then we can look at a couple of "sales strategies."

### Methodology

This is an interactive workshop, which mixes short presentation phases, plenary discussions and group work.

### Conditions

Laptop or tabletop computer with microphone and webcam. Built-in versions are sufficient.

### Organizational Information

Language / Format	English / Online
Target group	Advanced Doctoral Candidates and Postdocs from all faculties
Date	Thursday, 25 April 2024, 15:30 – 18:00
