

TwentyOne Skills

Design Thinking: Experience the Process and its Vital Methods (Part 1)

Objective

Design Thinking is a major innovation technique. In part one of our series, we run through the whole process in a sprint.

Description

- Using the basic principles of iteration, visualization, self-organization and rapid prototyping to develop own solutions for complex problems
- Concept, methodology and mindset of Design Thinking
- Going step by step through the five phases of this topic using Design Thinking methods
- Ideally done with a team, can be done individually, too.

The course can be used independently of parts two and three.

Conditions

In cooperation with TwentyOne Skills, GRADE offers about 35 asynchronous online courses.

The 3-month sessions start at the beginning of January, April, July and October.

Registration is possible at any time. Confirmed participants can access the courses for 3 months at the online platform of TwentyOne Skills. The current registration link can be found here: <https://tinygu.de/en21skills>
