- Freelance researcher at the Institute for Qualitative Research at the International Academy Berlin

Research interests:

- Qualitative methods
- Culture
- Identity
- Climate change
- Mobility

Objective

This workshop provides an overview on the theory and practice of qualitative interviews as a well-established and widely utilized method of data collection in qualitative research.

Description

During the workshop a variety of qualitative interview techniques will be discussed and their potential application and challenges considered. Pragmatic and technical issues of generating interview data will also be addressed.

Additionally, this workshop engages with the participants' own interview guides in an effort to further develop them in a practical manner.

Topics covered also include documentation, anonymization, and transcription.

Participants will be invited to submit interview guides prior to the workshop. More detailed information will be made available when the registration process is completed:

All documents from participants and the respective discussions are confidential and must not be used outside the workshop except after previous agreement by the authors.
