Scientific Paper Writing: Special Focus on Life and Medical Sciences

**Objective**
This online workshop concentrates on the process of writing an academic manuscript in the medical or life sciences. In addition to providing in-depth information for each manuscript section, choosing an audience, creating a story, explaining complex data and formulating convincing arguments will also be discussed. Workshop participants will be instructed in the formal and organizational aspects of academic writing and train their competency with exercises.

**Description**
At the end of the workshop participants will:
- have a detailed overview of the structure of a scientific manuscript,
- learn to build an interesting story from their data,
- improve their argumentation skills for writing convincingly,
- improve their writing structure and flow,
- be familiarized with the publishing process.

**Conditions**
Participants should bring:
- A 250-300 word abstract on their research in a file that is editable by computer
- One scientific paper of their choice (original papers only, no reviews please)

The workshop will be conducted online via Zoom. Participants will need a computer with a video camera and a microphone.

This workshop is a complementary module to our general workshop program on scientific writing. We strongly recommend attending one of those workshops to obtain an extended knowledge of academic writing and publishing.
