

Thermo Fisher Scientific CRISPR Cas9 Workshop 24.09.19 at Uni Campus Riedberg Frankfurt

Register via
QRcode or Email

Location: Buchmann Institut - Room 2.602

This seminar is about key considerations for your CRISPR Cas9 experiments. We will talk about the full gene editing workflow with a focus on the design of your gRNA and donor template, the different transfection options and how to detect the efficiency of your experiment.

- Please bring your own laptop for the exercise!
- Please register for the seminar by emailing the contact person below.

Date: 24 September 2019, 13:30 - 16:45

Agenda:

13:30 - 13:45	Welcome & Introduction
13:45 - 15:00	Theory: gRNA Design for Gene Knock Out & gRNA Design Exercise
15:00 - 15:45	Delivery - Key Considerations & Detection of Gene Editing Efficiency
15:45 - 16:30	Key Consideration for Knock-In Experiments & Exercise
16:30 - 16:45	Wrap up and Q&A Session
